

MDT-860

Pass on information
to your field staff

Better, faster, cheaper communication

Whatever type of fleet you operate it is essential to pass on valuable information quickly and accurately to your staff in the field.

You can dispatch complete job details, direction or messages to your field staff via the MDT-860 Mobile Data Terminal, utilising either your existing call management package, or the Navman OnlineAVL solution.

The MDT-860 offers fixed cost, reliable and secure two-way messaging, providing fast and dependable communication with your fleet.

MDT-860

Better, faster and cheaper

The MDT-860 provides you with better, faster and cheaper communication with your remote workforce. Whatever your industry or the size of your fleet, Navman offers you affordable real-time productivity.

"We took the road to better, faster, cheaper communications."

"We installed the Navman Wireless system to track, message and monitor our fleet. We are seeing significant savings on fuel, with better route planning, reduced mileage, greater utilisation of vehicles and less time wasted by both drivers and back office staff. Mobile costs are also being reduced.

Customers are becoming more demanding, and they want to know exactly where their parcel is and when it will arrive. We can now give them accurate information at any time. As the system automatically acknowledges the receipt of all messages to the vehicles once delivered, there is no room for doubt that a message may have not got through."

Charlie Peach

C&G Countrywide and Global
